

ISI Introduces Snapshot Software Suite, the Essential IT Managed Services Toolkit for Planning, Management, Maintenance, and Disaster Recovery

Infrastructure Solutions, Inc. (ISI), a leading provider of IT infrastructure assessment and optimization software products and services, announces the release of the new Snapshot Software Suite™ a comprehensive IT managed services toolkit for IT system planning, management, maintenance and disaster recovery. Snapshot Software Suite now combines its trusted discovery and inventory applications in Snapshot with Run Compare and Server Consolidation (SCON), powerful applications for IT planning, management, maintenance and disaster recovery tools, that work quickly and efficiently with all IT infrastructure hardware, network software, applications and configurations.

Minneapolis, MN ([PRWEB](#)) February 27, 2012 -- [Infrastructure Solutions, Inc. \(ISI\)](#), a leading provider of IT infrastructure assessment and optimization software products and services, announces the release of the new [Snapshot Software Suite](#) (TM) a comprehensive IT managed services toolkit for IT system planning, management, maintenance and disaster recovery. Snapshot Software Suite now combines its trusted discovery and inventory applications in Snapshot with Run Compare and Server Consolidation (SCON), powerful applications for IT planning, management, maintenance and disaster recovery tools, that work quickly and efficiently with all IT infrastructure hardware, network software, applications and configurations.

Snapshot Software Suite is an unparalleled, powerful, multi-purpose IT toolkit with advanced metrics and feature rich reporting capabilities for all physical, virtual and cloud based IT systems that IT service companies and professionals can use to complete critical and strategic tasks including:

- Physical, virtual and cloud infrastructure health checks, audits and assessments
- Hardware/software inventories, dependency mapping and workflow processes
- Real-time global software auditing, oversight and policy compliance reporting
- Server and storage consolidation, optimization and centralization
- Business continuation and disaster recovery planning and design
- Virtualization and optimization assessment, financial analysis, planning and implementation
- Data center relocation and consolidation analysis, planning, and design for cost reduction
- Merger and acquisition technical due diligence

The software suite is value priced; offering companies a 20% discount when purchasing the toolkit over the individual components. The Snapshot Software Suite pricing ranges from about \$7,500 for a single use as part of a small project to several hundred thousand for an unlimited perpetual license enabling purchasers to address a wide range of IT managed services needs.

“ISI is committed partnering with companies and IT professionals in meeting the critical IT needs of small, medium and enterprise businesses. We recognize the need for a powerful and complete tool set to do core and strategic IT tasks across the physical, virtual and cloud computing platforms that business rely on to reduce their operating costs and risk. We are proud of the new Snapshot Software Suite and the many benefits it offers IT service companies and the clients the serve,” said Willard (Bill) Cecchi, President of ISI.

To learn more about ISI’s Snapshot Software Suite or Snapshot, or to request a demo, please visit our website at <http://www.isiisi.com> or contact us at sales(at)isiisi(dot)com.

Infrastructure Solutions, Inc. (ISI) is based in St. Paul, Minnesota and has been providing leading software solutions to enterprise IT organizations worldwide through distinguished international channel partners, including IBM and Cisco Systems, Inc. ISI products help organizations assess, design, cost analyze and manage the consolidation and/or virtualization of IT infrastructure and network software between physical, virtual, and cloud platforms (P2V, V2V, V2P, V2C).
